

# CCBHC Checklist for Leaders

In order to serve a community in a new way, as a CCBHC, it requires leaders to think about solutions in new ways — in part by exploring partnerships and collaborations that leverage strengths. And when it comes to CCBHC requirements, organizations can very easily make a checklist of needs to see where additional support may be the most helpful. That checklist may include:

**Staffing**

**Training**

**Delivery of all required services**

**Care coordination**

**Scope of services**

**Quality metrics**

**Authority, governance & accreditation**
